

Execution Report

Title: **The Economics of Research Reproducibility**

Authors: **Jean-Edouard Colliard, Christophe Hurlin, Christophe Pérignon**

Full reference: Colliard, Jean-Edouard, Hurlin, Christophe, and Pérignon, Christophe, "The Economics of Research Reproducibility"

The structure and contents of this execution report provided by **cascad** for the certification are similar to those recommended by the [AEA Data Editor](#).

1. DATA DESCRIPTION

For the purpose of this study, data on authors' decisions to voluntarily make their paper reproducible was collected. The researchers used all papers published in the Journal of Financial Economics (JFE) between January 2010 and September 2020, which corresponds to a total number of 1,347 papers written by 2,231 authors. For a thorough description of the data, please refer to section 1.3.2 of the paper.

2. CODE DESCRIPTION

For the purpose of this certification, we aimed to check the results displayed in Table 1 and in Figures 2 and 3.

The Code is written in SAS and Mathematica. The replication materials contain one data file, *JFE data and code.xlsx*, that is first called by *Database Management.sas* to generate an Excel file, *Data_JFE.xlsx*. This file is then used by *Modelisation.sas* to generate Table 1. Meanwhile, two Mathematica notebooks, *Graph_2.nb* and *Graph_3.nb*, generate their respective figures.

3. REPLICATION STEPS

The resources were downloaded from the **cascad** website and run as per readme, using SAS 9.4 on a computer with 64GB RAM, intel® Core™ i9-9900K CPU @3.60-5.00GHz, Nvidia Geforce RTX 2060, and Windows 10 OS.

We encountered no issues during the replication.

4. FINDINGS

We reproduced the table and both figures with perfect accuracy.

4.1 TABLE 1: THE DRIVERS OF CODE AND DATA SHARING: EVIDENCE FROM THE JOURNAL OF FINANCIAL ECONOMICS.
