

Execution Report

Title: Crowdfunding Entrepreneurship: Evidence from US Counties

Authors: Thomas Lambert, Aleksandrina Ralcheva, and Peter

Roosenboom

Full reference: Lambert, Thomas, Ralcheva, Aleksandrina and Roosenboom, Peter "Crowdfunding Entrepreneurship: Evidence from US Counties", Working paper, February 14, 2024.

The structure and contents of this execution report provided by **cascad** for the certification are similar to those recommended by the <u>AEA Data Editor</u>.

1. DATA DESCRIPTION

This study uses CrowdBerkeley data on all Kickstarter projects from its inception in 2009 to 2018 to study the influence of reward-based crowdfunding on entrepreneurship.

For a thorough description of the data, please refer to Section 2.1 of the paper.

2. CODE DESCRIPTION

The verification package contains the following files:

analysis.do
cntycoord.dta
county-industry-year.dta
county-quarter.dta
county-year.dta
county_panel.dta
map.dta
setup.do
stats.dta
stcoord.dta

setup.do installs all necessary Stata packages, while analysis.do import the .dta files and generate the Tables and Figures. They are stored in a Results folder.

3. VERIFICATION STEPS

The code was downloaded from the **cascad** website on February 12 and run as per readme, using Stata 18 on a computer with 256GB RAM, Intel Xeon Silver 4210R 2.4GHz (40 cores), NVIDIA RTX™ A5000, and Windows 10 OS. We encountered no issues during the verification process.

4. FINDINGS

We reproduced Tables 1-9, IA1-IA6 as well as Figures 1-6 with perfect accuracy.
